

SERVICE FLAG INSTALLATION

INSTRUCTIONS FOR 15" OR 29" SERVICE FLAGS

For the 15" service flag, using a 7/16" wrench or a ratchet, tighten firmly

to upper corner of the chaise lounge. Illustrated in the picture.

The 29" service flag is attached to the seat frame in the same manner.

The STL clamp is a universal clamp and if you decide to purchase new chaise lounges, they can be removed and re-installed on your new chairs.
